

What's Inside Your I18N Toolbox?

Michael Kuperstein, Localization Architect

Loïc Dufresne de Virel, Localization Strategist

Intel Information Technology

What Should Be In Your I18N Toolbox? And Why?

Agenda

Tools

- Scanning Tools
- Automation Tools
- Parsing and Data Transformation Tools
- Carefully Designed Test Data and Test Scripts
- Various Language Versions of OS / Browsers

Processes

- I18N First, L10N second
- Pseudo-Localization

Libraries and Reference Materials

- Buy vs Build
- Reference Materials – Some of our Favorites

Tools – Scan for Everything

Scan source code for i18n Issues:

A	B	C	D	E
1	File name	Line	Error type	Issue
2	ExtUI.cpp	537	HardCodedString	MessageBox("Current settings are invalid.");
3	ExtUI.cpp	538	HardCodedString	MessageBox("Connection Settings");
4	cihvs.cpp	362	AnsiCRunTimeFunction	strlen
5	cihvs.cpp	60	AnsiCRunTimeFunction	strlen

Spelling checkers, terminology checkers, and content style guidelines:

Word	Count	Suggestion	Context
begining	1	beginning	Select 1 to enable a question window at the begining of the install process

→ avoid.Please

Please wait while the download is initialized.

Tools – Automation

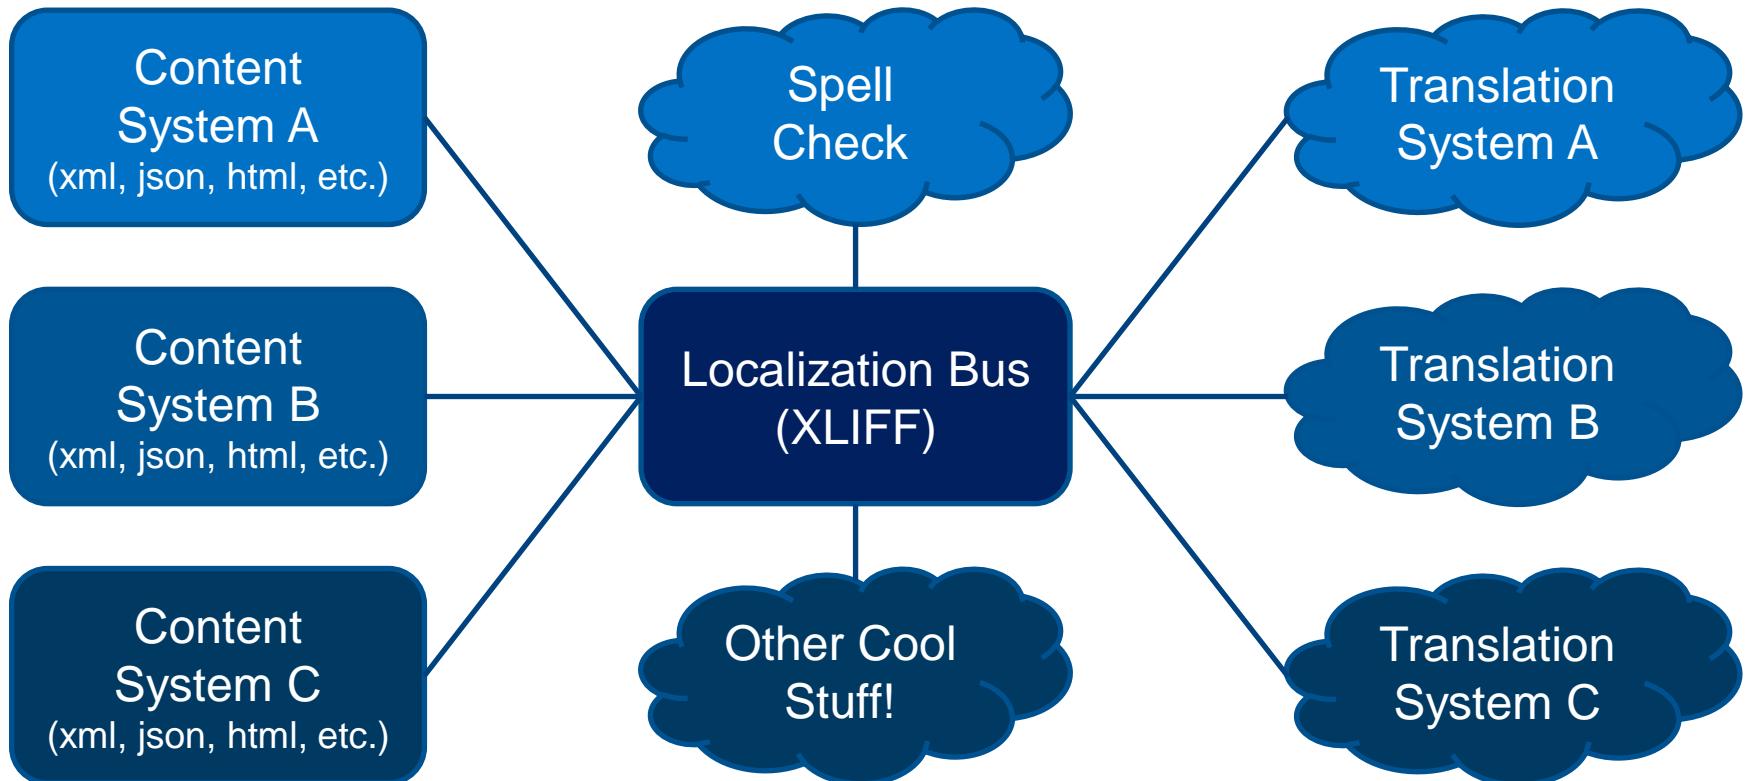

Automate Everything

- Agile Development requires a high degree of automation (esp. localization)
- Continuous Builds, Integration, Delivery: DevOps
- Capture Screenshots for both linguistic review and content delivery
- Test Automation – Automate Pseudo-Localized or non-English software

Your Mileage May Vary

- ROI is better for larger and longer-lived software
- Not so much ROI for a single dialog, or throwaway software

Tools – Parsing, Extraction, Transformation Tools

Tools – Test Data / Test Scripts

Begin testing with non-English data, because this sucks:

Find the dirtiest, nastiest data because that's real life. Find the longest names, addresses, phone numbers, URL's, mix up languages and scripts.

Tools – World-Ready OS, Frameworks, Browsers

The World Changes Really FAST:

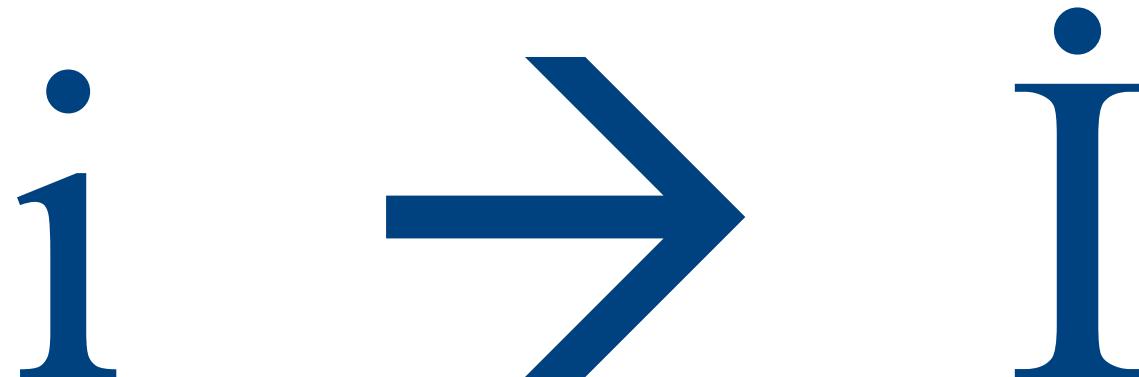

- Many laws and cultural norms change every year
 - Maps, currency symbols, time zones, dates, preferences, slang, etc.
 - Demographics of Social Media networks
- Technical changes
 - Example: Traditional Chinese Windows language tags:
 - First (CHT), then (zh-TW), then (zh-HK)
 - Example: Full-width colon and comma display issue on Windows 10

若系統在安裝程序期間需要更新韌體，你同意嗎？

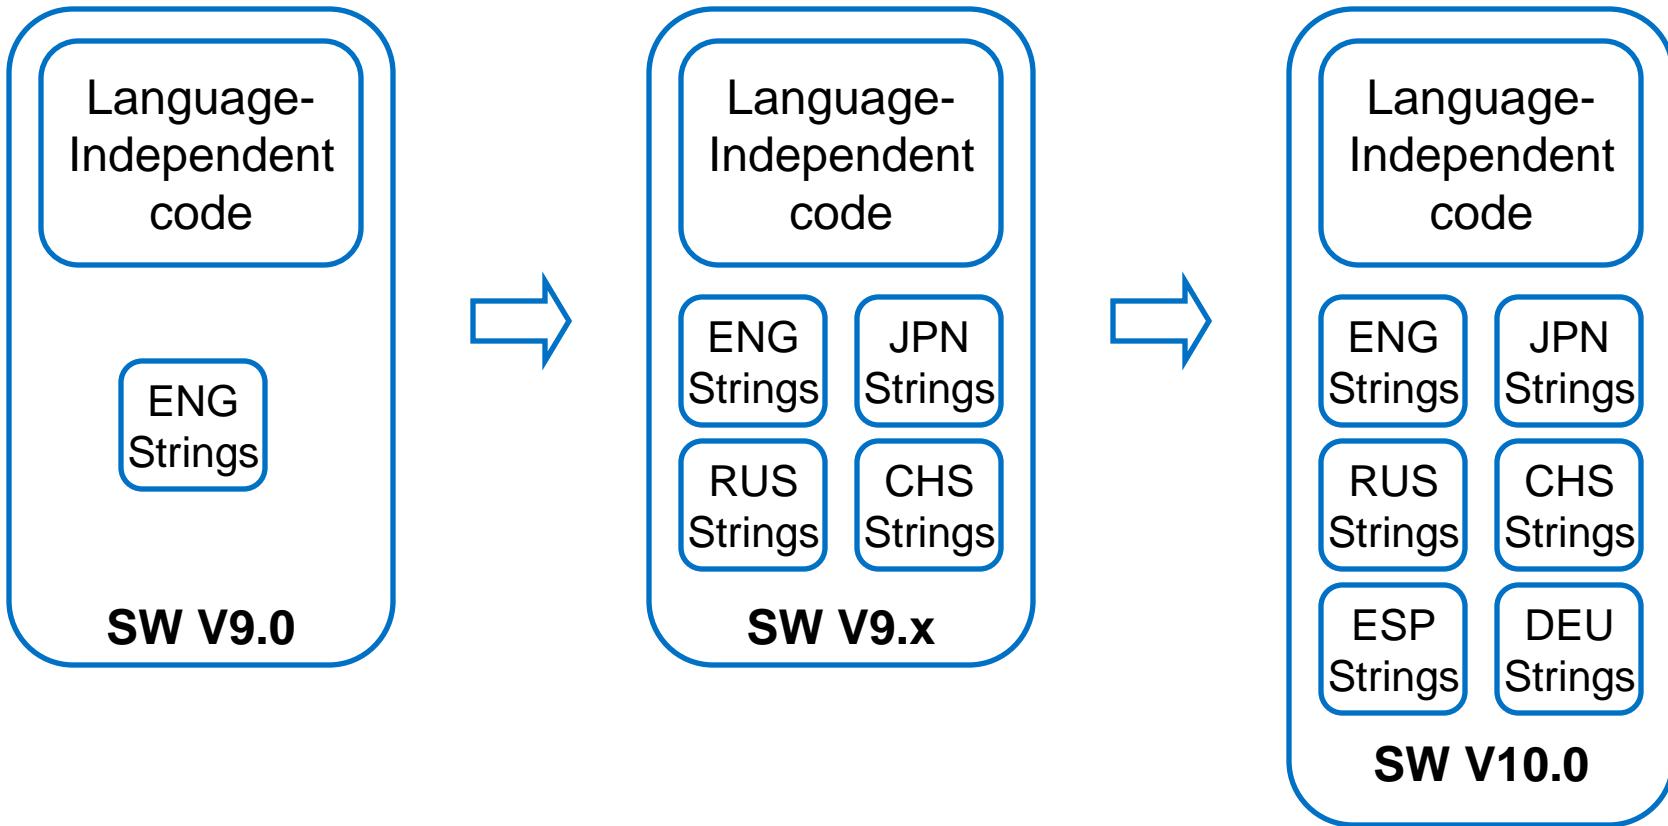

- 同意
 不同意

Tools – World-Ready OS, Frameworks, Browsers

ASCII content on a Turkish system can break installs and logins, and other stuff:

Processes – I18N First, L10N Second

Processes – [Pséëèúüùdóöò-Lóöòçáäàlíízáäàtííööòn]

→ «Tíy lögíñ àgàíñ Ràđđíñg Ràđđ»

«Sèlèçt tħiś óþtjóni tò lög off àñđ lög båçk iñ àgàíñ Ràđđíñg Ràđđ»

→ «Sṭà� lögħġeđ iñ bút şwiftxh tò offliñè Mōđe Ràđđíñg R;

«Sèlèçt tħiś óþtjóni tò remàiñ lögħġeđ iñ bút şwiftxh tò offliñè qoññektiżiñ Mōđe Ràđđíñg Ràđđíñg Ràđ»

Libraries – Are Awesome!

Strategy: (1) Buy if product meets 80% of requirements (2) Reuse (3) Build

- DIY if functionality doesn't exist yet
- DIY if you can't buy the functionality
- DIY if the functionality is your business core competency

Avoid
Do-It-Yourself
Failure!

Always Handy: Duct Tape and Crazy Glue

At the end of the day, you need good people to keep everything together

- Promote the right technical behaviors
 - Run code scans to identify large number of issues efficiently
 - Make pseudo-localization part of default build and test process
 - First use non-English test data
- Keep Learning, Influence and Train
 - Grow an enthusiastic and passionate core globalization team
 - Collect, organize, and share knowledge during the development process

THANK YOU

Any Questions?
